[1] First form withdrawal: prohibits the public entry of lands required for reclamation works. Second form withdrawal: permits entry under Reclamation Homestead laws.

[2] Discrepancies exist between revocation orders and BLM Master Title Plat in 2N7E. Shown as per BLM Master Title Plat.

[3] Depiction of distance from river based on location of river as shown on most recent available USGS topographic map. Location of Verde River in vicinity of Horseshoe Dam differs from location shown on BLM plats by approximately 1 mile.

[4] Second form withdrawals not shown.

[5] When Water Power Designation #6 was authorized in 1917, the General Land Office had not completed its survey of Arizona. WP #6 lists reserved land for "reservoirs, conduits, power plants and other power development works" in T1-3N, R6E and T12N, R6E. According to BLM protraction surveys and USFS maps, these are actually in T11N, R6E and T12N, R6.5E.
