Robert,

Hopefully by now you received Mr. Hjalmarson's entire report via Hightail. His critique of my accounting procedure begins on page 70 and goes through page 95.

Great, I'll look through this. Per our conversation yesterday morning, I think that the use of my data as a general approximation for your calculation purposes is not inappropriate, as long as it is clear that there are some significant assumptions being made. It's a valid point that they are really the only thing out there.

Thanks,
Rob
