Arizona State Land Department Technical Evidence for the San Pedro River in Cochise County

The Arizona State Land Department's technical evidence for the San Pedro River is the "Arizona Stream Navigability Study for the San Pedro River: Gila River Confluence to the Mexican Border," by CH2M Hill, SWCA Environmental Consultants, and the Arizona Geological Survey, November 1993. The report was revised by JE Fuller/Hydrology & Geomorphology, Inc., and the Arizona State Land Department in September 1997. Even though this report was written before the inception of the most recent bill, Senate Bill 1275, the technical evidence stands on its own. This report was previously submitted to the Arizona Navigable Streams Adjudication Commission (ANSAC).

In addition, the following agencies were contacted for new/supplementary information: The Arizona Department of Game and Fish, Arizona Department of Water Resources, Arizona Department of Environmental Quality, Arizona State Parks, United States Fish and Wildlife Service, and the Water Resources Research Center at the University of Arizona. No new information was turned in.

The Arizona State Land Department would like verbage to be excluded that reflects the prior bill, House Bill 2589, on the following pages: v., vi, 1-2, 3-26, 3-27, 5-16, 7-21, 7-22, 8-5, 8-6, 9-3, and 9-4.

Sincerely,

Cheryl K. Doyle
