

# ANSAC Public Hearing

## Santa Cruz County

Date: August 16, 2000

Time: 1:00 PM

Venue: Nogales, Arizona

Stantec Consulting, Inc.

Phoenix, Arizona

In association with:

PERKINS+WILL & COMPANY, INC.

Tempe, Arizona

Figure 2  
THREE-LEVEL WATERCOURSE  
EVALUATION PROCEDURE

# Three-Level Watercourse Evaluation Procedure

 = NR<sub>LX</sub> = Not Rejected

 = RL<sub>LX</sub> = Rejected

# Level 1 Evaluation

**Goal:**  
Coarse Sort  
Eliminate Watercourses Most Likely to be  
Non-Susceptible to Navigation

**Methods:**  
Quantitative Screening Analysis  
Binary Database Queries

**Parameters:**  
Stream Type  
Dam Information  
Historical Boating  
Modern Boating  
Fish  
Special Status

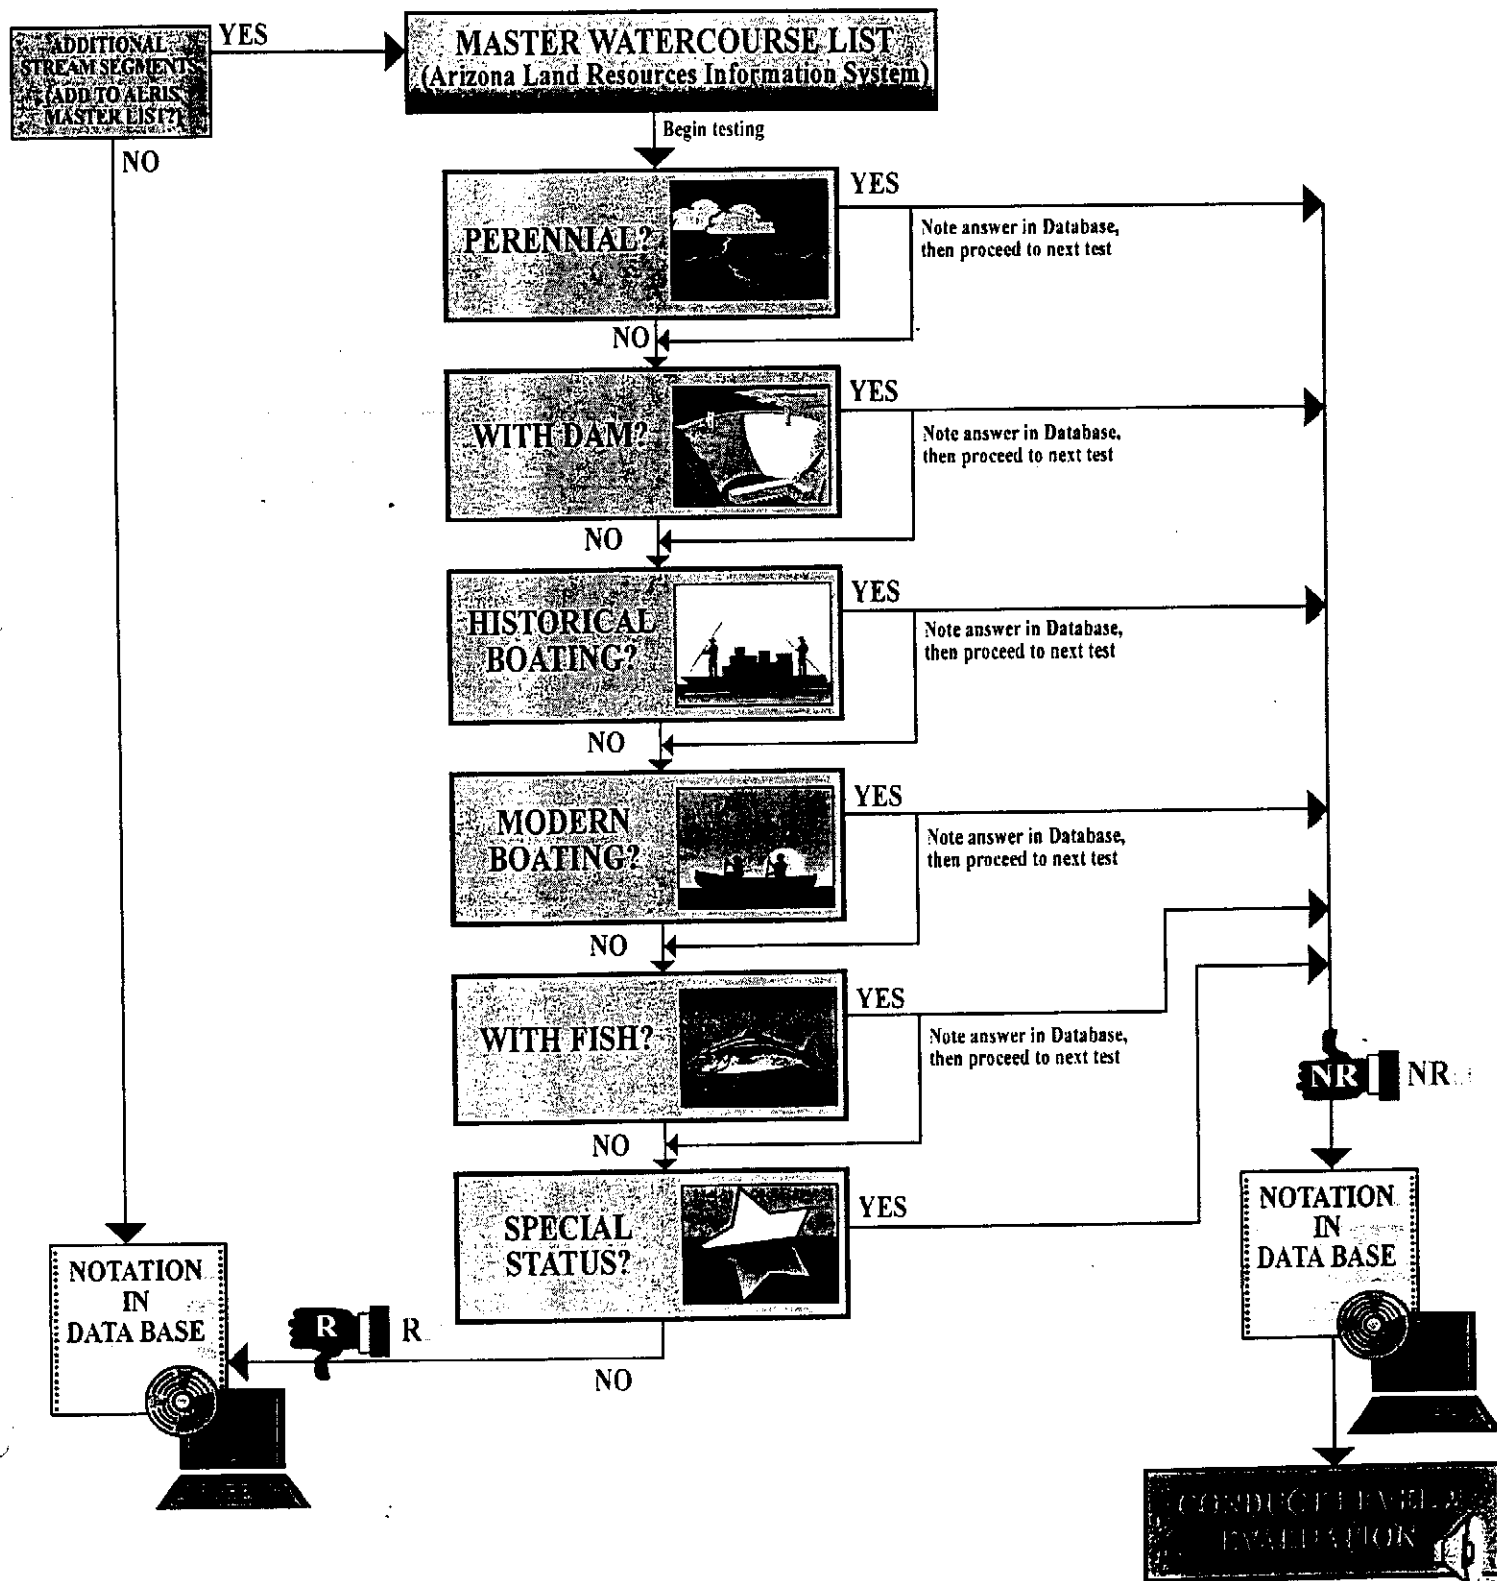

**Application:**  
Apply full test to all watercourses in the database catalog

**Results:**  
RL1: Watercourses which are most likely non-susceptible to navigation  
NRL1: Watercourses which require qualitative evaluation  
at Level 2

Figure 3  
LEVEL 1 SCREENING PROCEDURE

# Level 1 Screening Procedure

# Level 2 Evaluation

## Goals

Refined Sort  
 Eliminate Watercourses Unlikely to be Susceptible to Navigation

## Methods

Qualitative Approach  
 By Inspection  
 Quality Control Check

## Applications

Fish Categories  
 Coating Account Verification  
 Special Status Specifics  
 Outlier Verification

## Applicability

Apply to NRL1 watercourses in the database catalog

## Requirements

- RL2: Watercourses which are unlikely to be susceptible to navigation
- NRL2: Watercourses which merit quantitative engineering analysis at Level 3

## Level 2 Analysis - Refined Approach

## Watercourse Evaluation Analysis

### Justifications for the Refined Approach

- (1) The equal-weight system puts all streams (with the same number of affirmative responses) on the same level and importance.
- (2) Numerical weights should be established for the six criteria assigning the highest weight to the criterion which has the most significant bearing to the navigability question and the lowest weight to the criterion which has the least significant bearing to the navigability question.
- (3) A better ranking system can be made using the established weighting system.

# Level 2 Analysis - Refined Approach

## Steps in Establishing the Numerical Weights

- (1) Identify the criteria involved.
- (2) Compare each criterion with the rest of the criteria. For each comparison, assign a letter (indicating which criterion is more important) and indicate the level of preference.

For example a rating of A2 indicates that criterion A is a minor preference (2) over the other criterion.

- (3) For comparisons where no criterion is preferred, assign a preference level of 1.0

For example a rating of BF1 indicates that no preference is made between criterion B and criterion F.

- (4) Complete the exercise.

## Criteria

### Criteria Scoring Matrix

How Important
4 - Major Preference
3 - Medium Preference
2 - Minor Preference
1 - Letter/Letter
No Preference: each scored one point

A. Historical Boating									
B. Modern Boating	A2								
C. Perennial	C2	A1							
D. Dam-Impact	C3	D2	A3						
E. Special Status	D3	C4	B2	A4					
F. Fish	F3	D4	C2	BF1					
G.									
		G	F	E	D	C	B	A	
	Raw Score								
	Weight of Importance (0-10)								

# Level 2 Analysis - Refined Approach

## Steps in Establishing the Numerical Weights

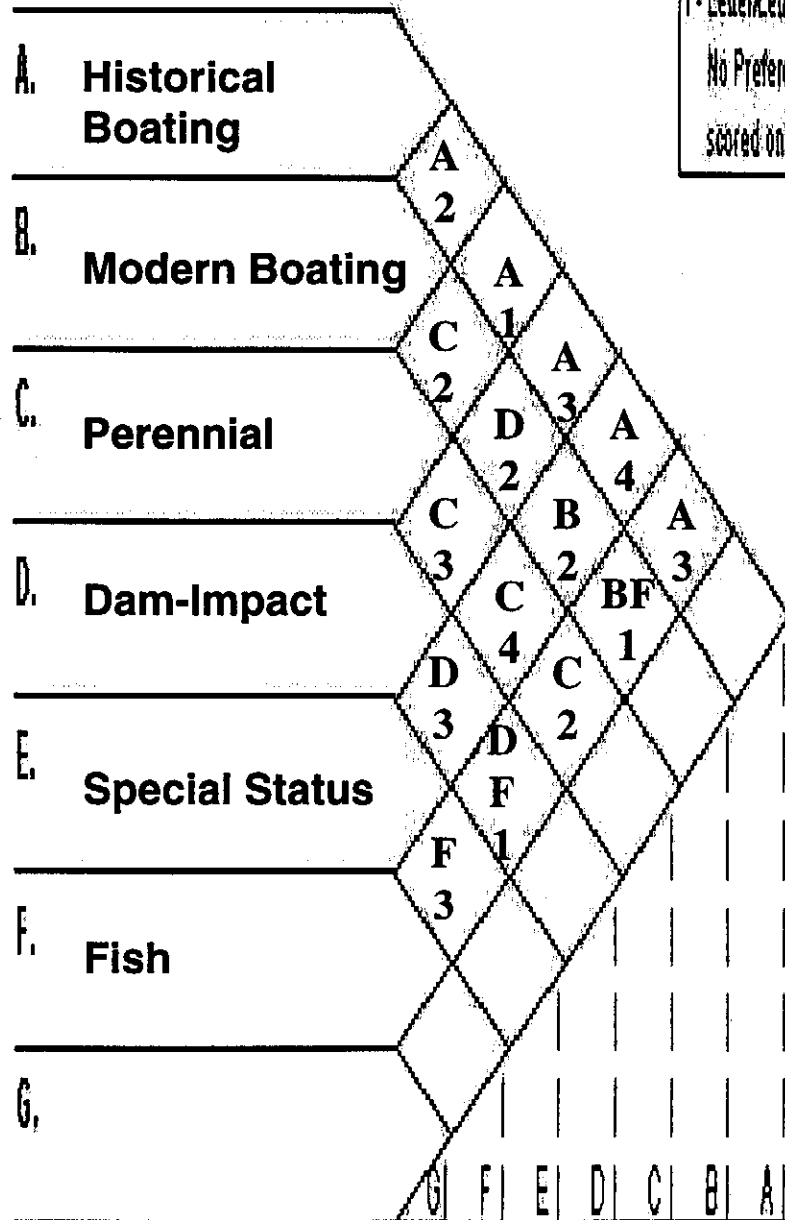

(8) If a number of participants are involved in the exercise, the numerical weights are determined from the average values evaluated.

	Participants						Ave.
	2	3	4	5	6	7	
9	10	10	10	10	10	10	10
3	7	10	9	7	10	7	8
8	5	8	6	6	7	6	7
7	2	4	2	4	5	3	4
2	3	2	2	2	2	2	2
4	3	6	3	3	3	5	4

## Criteria

How Important  
 4 - Major Preference  
 3 - Medium Preference  
 2 - Minor Preference  
 1 - Letter/Letter  
 No Preference - each scored one point

## Criteria Scoring Matrix

	G	F	E	D	C	B	A
Raw Score		5	0	6	11	3	13
Importance (0-10)		4	2	7	8	3	9

Importance (0-10)

Total

# Level 2 Analysis - Refined Approach

## Steps in Establishing the Numerical Weights

(8) If a number of participants are involved in the exercise, the numerical weights are determined from the average values evaluated.

As an example, the case of Sonoita Creek in Santa Cruz County is considered.

	Participants						Ave.
	2	3	4	5	6	7	
9	10	10	10	10	10	10	10
3	7	10	9	7	10	7	8
8	5	8	6	6	7	6	7
7	2	4	2	4	5	3	4
2	3	2	2	2	2	2	2
4	3	6	3	3	3	5	4

	Rating	Weight	Refined Rating
Hist. Boating	0.0	10	0.0
Mod. Boating	0.0	8	0.0
Perennial	1.0	7	7.0
Dam-Impacted	1.0	4	4.0
Special Status	0.5	2	1.0
Fish	1.0	4	4.0
<b>Total Rating</b>	<b>3.5</b>		<b>16.0</b>

# Level 2 Analysis Results

Recommended Level 3

  Old Rating System
  New Rating System
  Studied Level 3

1 27 53 79 105 131 157 183 209 235 261 287 313 339 365 391 417 443 469 495 521 547 573 599 625 651 677 703 729 755 781 807 833 859 885 911 937 963 989 1015

Rank

Kanab Creek (Mohave/Coconino)

Aravaipa Creek (Graham/Pinal)

Trout Creek (Mohave/Yavapai)

Pinal Creek (Gila)

Beaver Dam Wash (Mohave)

## Level 3 Evaluation

### Criteria

- Fine Sort
- Eliminate Watercourses Non-Susceptible to Navigation

### Methodology

- Quantitative Engineering Methodologies
- Detailed Hydrologic and Hydraulic Analysis

### Parameters

- Flow Rate
- Flow Characteristics
- Obstacles

### Application

- Apply to NRL2 watercourses in the database catalog

### Navigation Database

- RL3: Watercourses which are not susceptible to navigation
- NRL3: Watercourses which are susceptible and merit more detailed study

## Detailed Study

### Goal

Final Sort

Perform Detailed Fact-Finding Study  
Addressing Susceptibility and  
Actual/Historical Navigation

### Methodology

Same as for Major River Studies  
Qualitative and Quantitative Detailed Study  
Test for Navigation In Fact - Actuality  
Apply the criteria contained in ARS 37-1128 (D)

### Data Requirements

Extensive  
Technical Data  
Historical Information

### Application

Apply to NRL3 watercourses in the database catalog

### Resulting Datasets

RDS: (Rejected Detailed Study)- Watercourses which are not susceptible to navigation, and with no evidence of actual/historical navigation  
ADS: (Accepted Detail Study)- Watercourses which are susceptible and/or show evidence of actual/historical navigation

# Santa Cruz County

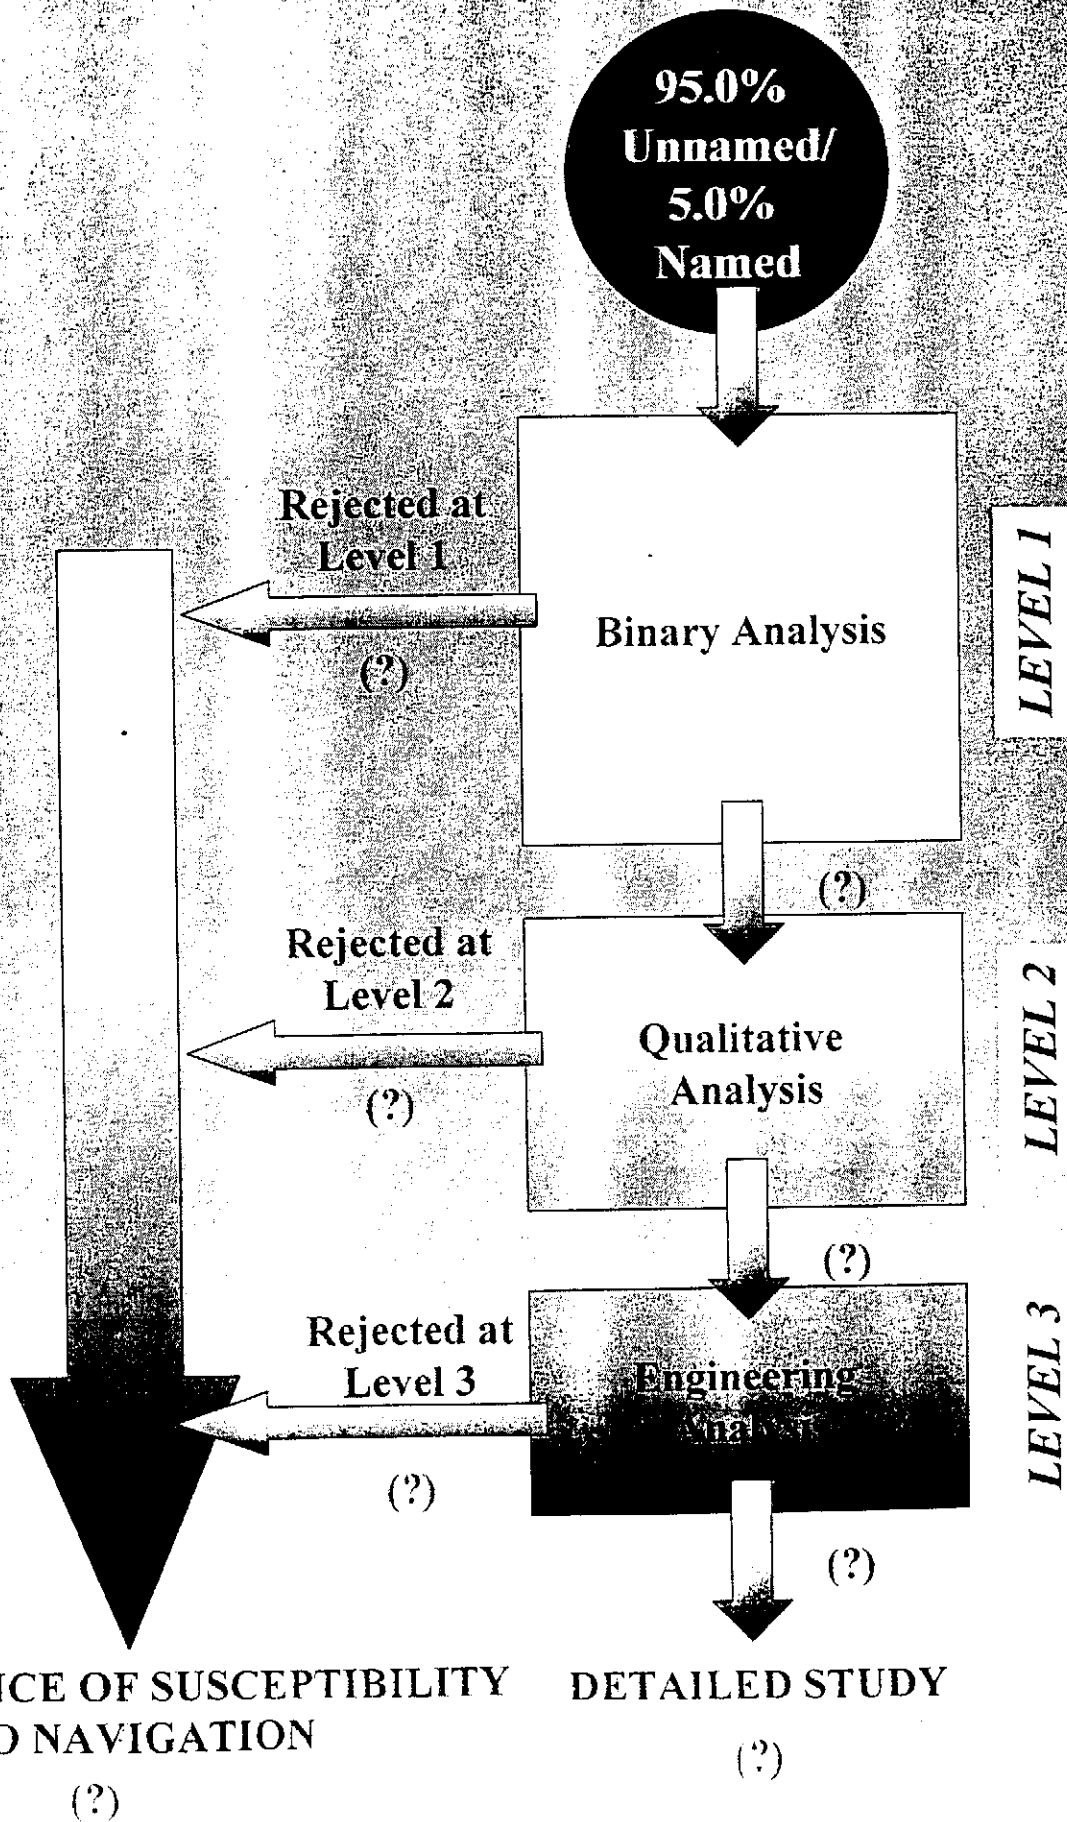

## COUNTY DESCRIPTION:

- Located in the southern section of the State.
- Borders the country of Mexico to its south and the counties of Pima to its north and west and Cochise to its east.
- Land area is approximately 1,235 sq. mi.
- It consists of about 524 small & minor watercourses.
