

DESTRUCTION OF FISH.

It is to be regretted that Arizona has no law for the protection of fish. in her rivers. Almost daily we see great loads of fish coming into Phonix from the Salt river that have been caught by the use of Giant powder. No secret is made of the fact whatever. The worst feature of the matfer is, that not only are fish fit for the market taken, but the fry are also destroyed and large quantities of fish considered too small to trouble with are left to decay. The river has been nicely stocked with e. cellent fish, but is being rapidly depopulated, and a coxple of years more will leave that menutiful stream without a single fish, if some means are not found to check this wanton and wicked destruction of its finny inhabitants. We say wicked because it is a destruction of food, unnecessary and uncalled for. The time has been when the river would furnish and excellent breakfast of fish for every table now in the valley during the entire fishing season. In short it has contained great abundance of fish. Are there no means by which this abuse can corrected until the next legislature meets? Have our Board of Supervisors no jurisdiction in the matter ?

and the county.

fire till the proper moment.

DESTRUCTION OF FISH.

ter is, that not only are fish fit for the own territory. Sonora is a tertile agmarket taken, but the fry are also ricultural district raising a large vadestroyed and large quantities of fish trety of products in her warm coast fish, if some means are not found to check this wanton and wicked de in the west where authracite coal, in the west where struction of its finny inhabitants, which commands a high price in We say wicked because it is a de- California cities, can be mined. But struction of food, unnecessary and its chief value lies in its mineral uncalled for. The time has been wealth. There are few farms in Sonowhen the river would furnish and ex rathat do not show traces of ore decellent breakfast of fish for every ta. | posits, but the Americam machinble now in the valley during the en- er; such as is used in the mines of tire fishing season. In short it has Nevada and California is needed to contained great abundance of fish, work the veins. Still in 1870 there Are there no means by which this were one hundred and forty-four abuse can corrected until the next mines worked in the State, though legislature meets? Have our Board there were but one hundred and nine of Supervisors no jurisdiction in the thousand inhabitants. At the same time 563 productive mines were re-

ported abandoned. The chief exports Russia is on the brank of a terrible of Sonora are gold, silver, hides, pepacvolution.
